

Coorest Web

Cryptocurrency is a form of payment that can be exchanged online for goods and services... Cryptocurrencies work using a technology called blockchain. Blockchain is a decentralized technology spread across many computers that manages and records transactions. Part of the appeal of this technology is its security.

BECOME AN INVESTOR Invest in Green Projects

Investment is an asset acquired or invested in to build wealth and save money from the hard earned income or appreciation. Investment is primarily made to obtain an additional source of income or gain profit from the investment over a specific period of time.

1 Reason to Invest

The investor enables the farmer to work by allocating capital to the farmer. Both small and big investors will be able to participate in new projects. Coorest believes there should be equal opportunities for both retail and institutional investors. Investors will be able to buy into new projects and stake their assets on the platform to gain additional benefits.

[Start](#)

2 How To Invest

Investing is a way to potentially increase the amount of money you have. The goal is to buy financial products, also called investments, and hopefully sell them at a higher price than what you initially paid... When you invest, you're purchasing products and keeping your money in a specified investment account.

3 Benefits to Invest

An investment can refer to any mechanism used for generating future income. This includes the purchase of bonds, stocks, or real estate property, among other examples. Additionally, purchasing a property that can be used to produce goods can be considered an investment.

INVEST FOR YOUR FUTURE

Buy Carbon Credits

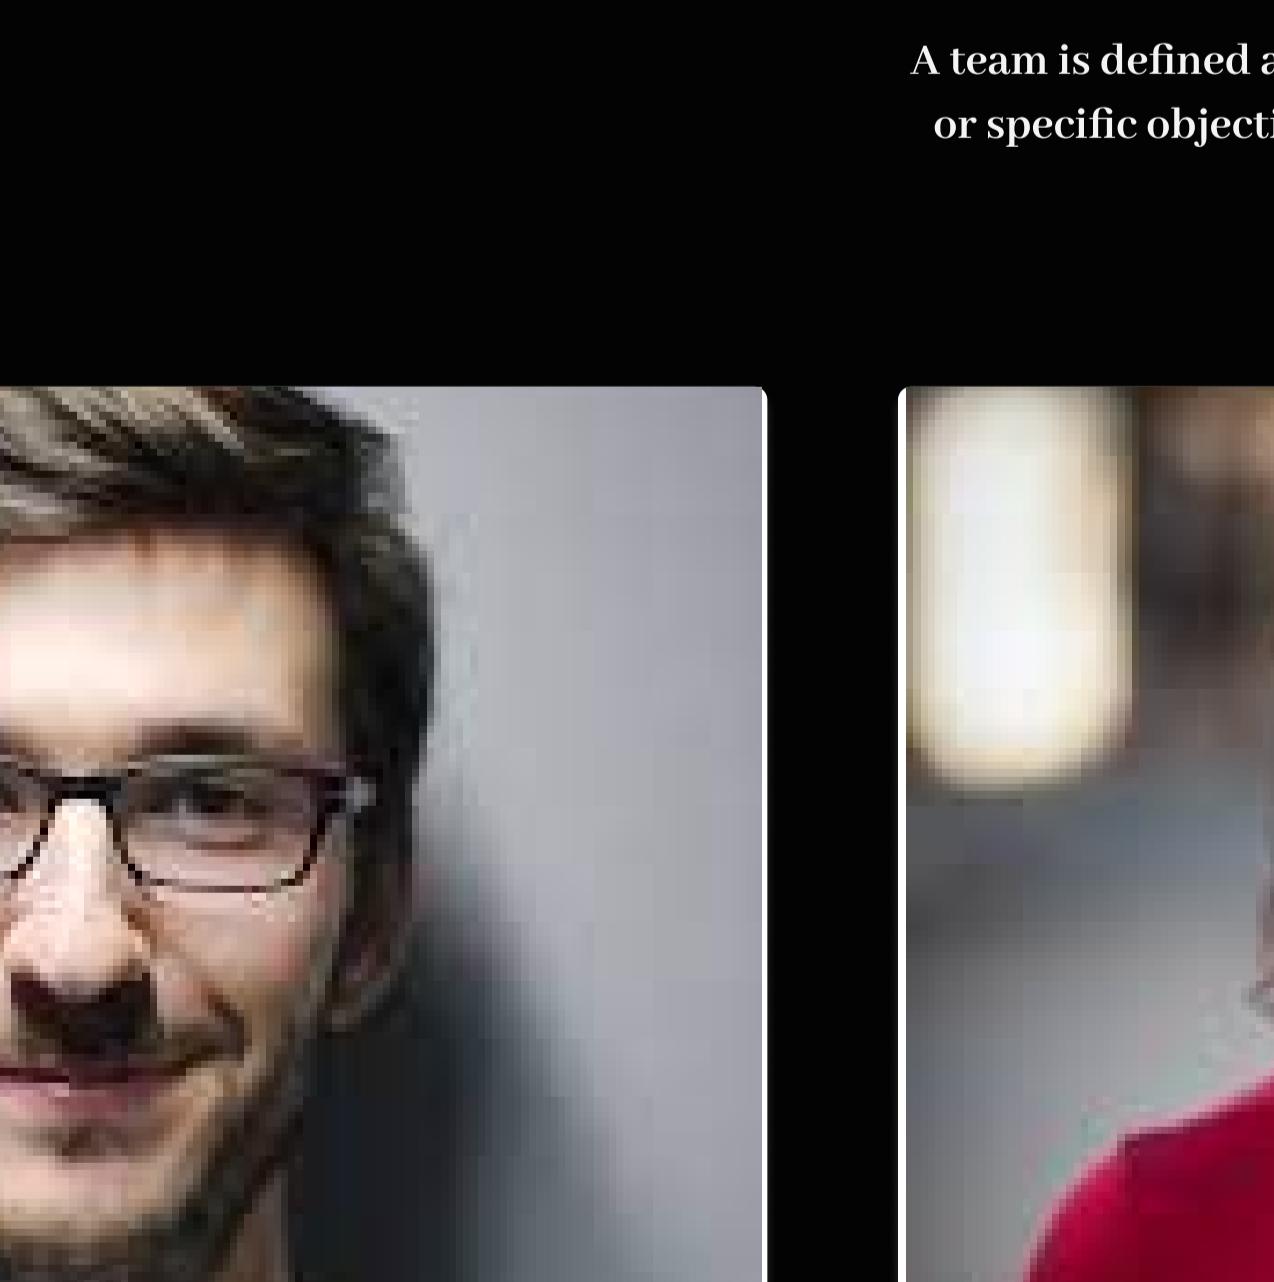

You can directly purchase carbon credits from sellers on the platform and burn them to get a Pocc.

A carbon credit is a permit that allows the company that holds it to emit a certain amount of carbon dioxide or other greenhouse gases. One credit permits the emission of a mass equal to one ton of carbon dioxide. The carbon credit is one half of a so-called "cap-and-trade" program.

OnBoard Projects

As a farmer you are doing the actual hard work to capture CO2 by growing food, and therefore should be at the center of the Coorest ecosystem. Onboard your crops and tap into capital streams. This allows you to grow existing projects or start new ones. Please read our white paper for more information about Coorest.

Meet Our Team

A team is defined as a group of people who perform interdependent tasks to work toward accomplishing a common mission or specific objective... Others are ongoing, such as a department team that meets regularly to review goals, activities, and performance. An organization with many teams requires careful alignment.
